about Balloonia

Balloonia® pro-Quality

Hace más de 15 años, la familia Manzano decidió convertir su experiencia de varias décadas en el mundo del globo en un sueño llamado **Balloonia.** Un proyecto nacido de la ilusión, el esfuerzo y la pasión por crear algo especial, con un propósito muy claro: ofrecer **productos de máxima calidad** y hacer que cada cliente se sienta parte de nuestra historia.

Desde nuestros inicios hemos trabajado con constancia para mejorar cada día. Gracias a esa dedicación, hoy contamos con una amplia gama de modelos y colores que nos han permitido convertirnos en un referente en el sector de la **decoración profesional con globos a nivel mundial.**

Disponemos de más de 10.000 m² de instalaciones equipadas con tecnología de última generación para la fabricación, impresión y envasado de globos. Además, seguimos avanzando hacia una producción más sostenible gracias a la **incorporación de paneles fotovoltaicos,** reduciendo significativamente nuestra **huella de carbono.**

En Balloonia utilizamos látex de **caucho natural de origen vegetal** como materia prima principal para fabricar nuestros globos en España. Este material renovable se obtiene de árboles de Hevea brasiliensis, que absorben CO_2 durante su crecimiento y almacenan carbono en su biomasa. Durante la fabricación, el látex se combina con otros componentes para aportar al globo las propiedades necesarias de elasticidad, resistencia, color y estabilidad. Nuestro compromiso es ofrecer información clara y transparente sobre el origen de nuestras materias primas y nuestro proceso de fabricación. Todo ello respaldado por un **Sistema de Gestión de la Calidad conforme a la norma UNE-EN ISO 9001.**

El crecimiento de Balloonia ha sido posible gracias a la **confianza de distribuidores y clientes nacionales e internacionales** que valoran no solo la calidad de nuestros productos, sino también nuestro compromiso y cercanía.

Más que fabricar globos, en Balloonia creamos ilusión. Somos una gran familia que trabaja con **responsabilidad, innovación y cariño,** manteniendo vivos los valores que nos han acompañado desde el primer día.

Porque nuestra mayor satisfacción no es solo fabricar un gran producto, sino formar parte de los momentos más especiales de quienes confían en nosotros.

Desde la humildad, el respeto y el deseo de seguir creciendo y mejorando en este apasionante camino, esperamos verles por él y compartir juntos muchos años más de ilusión.

More than 15 years ago, the Manzano family decided to turn their decades of experience in the balloon industry into a dream called Balloonia. A project born from enthusiasm, hard work and a passion for creating something special, with one clear purpose: to offer the ***highest-quality products*** *and make every customer feel part of our story.*

Since our beginnings, we have worked consistently to improve every day. Thanks to this dedication, we now offer a wide range of models and colours that have helped us become a global benchmark in the ***professional balloon decoration industry.***

We operate from facilities spanning more than 10,000 m², equipped with state-of-the-art technology for balloon manufacturing, printing and packaging. We are also moving towards more sustainable production by ***incorporating photovoltaic solar panels,*** *significantly reducing our carbon footprint.*

At Balloonia, we use ***natural rubber latex of plant origin*** *as our main raw material to manufacture our balloons in Spain. This renewable material is obtained from Hevea brasiliensis trees, which absorb CO_2 as they grow and store carbon in their biomass. During manufacturing, the latex is combined with other components to give the balloons the required properties of elasticity, strength, colour and stability. We are committed to providing clear and transparent information about the origin of our raw materials and our manufacturing process. All of this is supported by a* ***Quality Management System that complies with the UNE-EN ISO 9001 standard.***

Balloonia's growth has been made possible by the ***trust of distributors and customers, both in Spain and internationally,*** *who value not only the quality of our products but also our commitment and personal approach.*

At Balloonia, we do more than manufacture balloons — we create joy and excitement. We are one big family working with responsibility, innovation and care, keeping alive the values that have guided us since day one.

Our greatest satisfaction lies not only in manufacturing an outstanding product, but also in being part of the most special moments for those who put their trust in us.

With humility, respect and a desire to continue growing and improving on this exciting journey, we look forward to welcoming you and sharing many more years of joy together.

We LOVE Balloons

But we also love our world!

We know you care about the enviroment and so do we!

ES Nuestros globos se fabrican en España utilizando **látex de caucho natural**, una materia prima de origen vegetal obtenida de la savia del árbol del caucho (*Hevea brasiliensis*).

El látex se recoge mediante pequeñas incisiones en la corteza, sin necesidad de talar el árbol, que puede seguir produciendo durante años. Durante la fabricación, se combina con otros componentes para aportar al globo **elasticidad, resistencia, color y estabilidad**.

El caucho natural es una materia prima de **origen vegetal y renovable**, a diferencia de los cauchos sintéticos, que proceden principalmente de materias primas fósiles. Además, los árboles de caucho absorben CO_2 durante su crecimiento y almacenan carbono en su biomasa.

En Balloonia apostamos por la **transparencia**, por eso destacamos lo que podemos documentar: **utilizamos látex de caucho natural como materia prima principal y fabricamos nuestros globos en España**.

EN Our balloons are manufactured in Spain using **natural rubber latex**, a plant-based raw material obtained from the sap of the rubber tree (*Hevea brasiliensis*).

The latex is collected through small incisions in the tree's bark, without cutting the tree down. During manufacturing, it is combined with other components to provide the balloon with the required **elasticity, strength, colour and stability**.

Natural rubber comes from a **plant-based and renewable source**, unlike synthetic rubber, which is mainly derived from fossil-based raw materials. Rubber trees also absorb CO_2 as they grow and store carbon in their biomass.

At Balloonia, we believe in **clear and transparent information**. That is why we focus on what we can document: **we use natural rubber latex as our main raw material and manufacture our balloons in Spain**.

Personaliza tu globo.

Customize your balloon.

Tu marca
Your brand

- Los globos de látex son una forma original de dar **visibilidad a su negocio o evento**, es un soporte publicitario muy económico.

Latex balloons are an inexpensive publicity platform for increasing the visibility of your business or event.

- Somos una empresa comprometida con la **sostenibilidad y protección del medio ambiente.**

We are a company committed to the environment and sustainability.

- Las tintas con las que imprimimos cumplen con la normativa vigente. **no son tóxicas.**

The inks we use to print them comply with the prevailing regulotions; they are non-toxic.

- Cumplimos con la Directiva 2009/48 sobre lo **Seguridad de los Juguetes.** Los globos de látex están clasificados como juguetes con un nivel muy alto de regulación.

We comply with Directive 2009/48/EC on Toy Sofety. Lotex balloons are classified as toys and are subject to strict regulations.
